Guys, remember the purpose of the tiger team is *internal* communications. While you have been doing stellar work communicating with outside communities, are your internal partners in XA, RC and EJ up to speed and ready to assist? Your leadership has decided more work needs to be done in this area.

At other sites, the communication effort has been enhanced by input from an internal team. My profound hope and desire for San Jac is that when you go out into communities, you are fully supported by an informed and involved staff back at the office.

Cindy, as Sr. CIC and RPL I have handled all communications, public interaction, and facilitation for this site in close coordination with the site team.

Donn,

Please see Cynthia's email below.

Cynthia,

I would suggest that Donn discuss the communications plan that's in place now. On the new topics, I would suggest development of a plan for elected briefings (scope/method/etc.); and Development of a plan for community outreach between now & the Proposed Plan this summer.

Thanks,

I'd like to have an agenda. I'd like to start out with you talking about the communication needs you have (letters and briefings). The team can discuss how to work together to help the effort succeed. For example, I've invited David Reazin to talk about electronic means of briefing, such as webinars and Adobe Connect. He has helped train people on these methods and can give us advice on strengths/weaknesses.

Please call me.
